OBJECTIVE

Electronics and Communication Engineering student with strong exposure to Python, AI/ML, IoT, and web technologies, focused on contributing to real-world product development and engineering initiatives. Experienced in building end-to-end systems and supporting technical teams in delivering reliable, scalable solutions. Committed to transforming ideas into practical results that support project success and organizational growth.

EDUCATION

Vignan Institute of Technology and Science <i>Bachelor of Technology – Electronics and Communication Engineering</i> CGPA: 8.51 / 10.0	2023 – 2027
SR Junior College <i>Intermediate – Mathematics, Physics, Chemistry (MPC)</i> Percentage: 82.8%	2021 – 2023

TECHNICAL SKILLS

Programming Languages: C, Python (Intermediate), Java (Basic)
Web Technologies: HTML, CSS
Databases: SQL, Supabase
Developer Tools: Git/GitHub, VS Code
Relevant Coursework: Multisim, Proteus, Scilab, Dosbox, Verilog
Concepts: Data Structures and Algorithms, Problem Solving
Soft Skills: Cross-Functional Collaboration, Technical Articulation, Analytical Reasoning, Learning Agility

PROJECTS

AI Prescription Guard | *Python, Flask*

- Initiated a system to analyze prescriptions and provide AI-driven medical insights, aiming to reduce human errors in healthcare support.

Digital Footprint Risk Analyzer | *Web App, AI/ML, APIs*

- Proposed and prototyped a platform to assess online presence, generating a personalized “Digital Risk Score” for individuals and businesses.

Autonomous Cryptocurrency Intelligence System (SIH-2025) | *AI/ML, NLP, Web Scraping, Graph Analytics*

- Designed and prototyped a platform for collecting and analyzing publicly available cryptocurrency address data.
- Applied NLP, pattern-based extraction, and ML-driven clustering/classification to surface contextual risk indicators, with graph-based visualization for network analysis.

Multi-Language Voice-Controlled IoT Home Automation | *Raspberry Pi, Google Assistant, PHP, IoT*

- Built a smart home automation system enabling multi-language voice control of appliances using Google Assistant and a custom Android app.
- Developed Raspberry Pi-based web services for real-time GPIO device control with end-to-end hardware-software integration.

CERTIFICATIONS

Data Analyst Job Simulation | *Deloitte (Forage)*
Cyber Job Simulation | *Deloitte (Forage)*
Software Engineering Job Simulation | *JPMorgan Chase (Forage)*
GenAI Powered Data Analytics Job Simulation | *TATA (Forage)*
Introduction to Generative AI | *IBM*

ACHIEVEMENTS

Smart India Hackathon (SIH) Finalist | 2025
Nxtwave Buildathon | *State Level*
AIGNITE 2025 Hackathon | *Top 10 – Malla Reddy Engineering College*
